HEALTH

# Personalized wellness. Made simple.

---

FEEL BETTER. THINK CLEARER. LIVE MORE.

RETRA HEALTH

# What are peptides?

Peptides are short chains of amino acids that act like messengers in your body, helping to support important functions like energy, metabolism, recovery, healthy aging and more.

---

YOUR BODY SPEAKS PEPTIDES.  
WE HELP YOU LISTEN.

RETRA  
HEALTH

# Why are people talking about peptides?

Because more people are looking for proactive, personalized ways to feel better, have more energy, perform at their best and age well. Peptides are part of a new wave of science-backed wellness solutions that support these goals.

---

REAL SCIENCE. REAL POTENTIAL.  
A BRIGHTER YOU.

RETRA  
HEALTH

# Are peptides all for **weight loss**?

No. While peptides can support healthy metabolism and weight management, they also offer benefits for energy, cognition, sleep, recovery, hormones, skin health, and more.

---

PEPTIDES SUPPORT  
A WIDE RANGE OF GOALS.

# What is the U.S. market opportunity?

The U.S. peptide category is still early, but demand is expanding quickly as more consumers explore provider-guided options for weight, recovery, longevity, and overall wellness.

Hey [Name]! I wanted to reach out because we're launching something new called Retra Health, and you were one of the first people I thought of.

It's focused on peptides and personalized wellness, helping people in areas such as weight + metabolic health, hormones, energy + longevity, skin + hair, and more.

I'm putting together a short list of people who want to see what we're launching when it goes live.

Would you like me to send you the details?

COPY. PASTE. SEND.

# Sort them.

Once they reply yes, use one quick question to identify what they want most.

Absolutely! The easiest way to point you in the right direction is to ask one quick question:

**Are you more interested in:**

- 1 Improving your own health + wellness
- 2 Learning about the business opportunity
- 3 Both

Just send me 1, 2, or 3 and I'll send you the right info.
