Explore the collection

Explore treatment options across six areas of wellness, compare the details and complete the secure online process to begin.

01 Weight + Metabolic Health 03

02 Hormones + Vitality 04

03 Skin + Hair 04

04 Recovery + Wellness 05

05 Energy + Longevity 06-07

06 Sexual Wellness 08

A clear way to compare

All prices are in USD. QV and CV are product volume values, not cash commissions.

Durations are approximate supply estimates. A use count is not a day count. Product images are illustrative; pharmacy packaging may vary.

01 / Weight + Metabolic Health

Explore options for appetite, fullness and weight management.

Tirzepatide

Two vial options: 2 mL / 6 mL

Tirzepatide acts on GIP and GLP-1 pathways involved in appetite and blood sugar regulation. It can help reduce hunger and increase feelings of fullness, supporting weight loss alongside healthy eating and activity. Supply length varies with the prescribed dose.

POTENTIAL BENEFITS

Appetite control / Greater fullness / Weight management

QUANTITY	APPROX. SUPPLY	CUSTOMER	PROMOTER	QV	CV
20 mg / 2 mL	30 days	$259	$229	115	80
60 mg / 6 mL	12 weeks	$499	$449	225	157

Semaglutide

Two vial options: 4 mL / 5 mL

Semaglutide acts on the GLP-1 pathway involved in appetite and blood sugar regulation. It can help reduce hunger and increase feelings of fullness, supporting weight loss alongside healthy eating and activity. Supply length varies with the prescribed dose.

POTENTIAL BENEFITS

Reduced hunger / Greater fullness / Weight management

QUANTITY	APPROX. SUPPLY	CUSTOMER	PROMOTER	QV	CV
10 mg / 4 mL	12 weeks	$279	$249	125	87
25 mg / 5 mL	6 months	$499	$449	225	157

02 / Hormones + Vitality

Explore hormone treatments for personalized care.

Enclomiphene (90 ct)

Approx. 90-use supply. | 90 count

Enclomiphene is an oral treatment studied in men with certain forms of low testosterone. It acts on hormone signals that encourage the testes to produce testosterone, rather than supplying testosterone directly. Research has also examined its effects on sperm production.

AREAS STUDIED

Own testosterone production / Hormone signaling / Sperm production

CUSTOMER	PROMOTER	QV	CV
$499	$449	225	158

03 / Skin + Hair

Explore topical care for smoother-looking skin.

GHK-Cu Cream

Approx. 30-day supply. | 30 g tube

GHK-Cu Cream contains a copper peptide researched for skin renewal and collagen-related processes. Small studies of topical copper peptide products have explored skin texture and the appearance of fine lines. Results can vary with the formulation and the person's skin.

BENEFITS STUDIED

Smoother-looking skin / Fine-line appearance / Skin texture

CUSTOMER	PROMOTER	QV	CV
$169	$149	75	52

04 / Recovery + Wellness

Explore growth-hormone pathways and recovery research.

Sermorelin

Approx. 30-day supply. | 5 mL vial

Sermorelin stimulates the body's release of growth hormone. Growth hormone plays a role in normal growth, body composition, and tissue maintenance. Any benefit depends on the person's hormone status and reason for treatment, with provider evaluation and monitoring guiding care.

BIOLOGICAL ROLES

Growth hormone release / Tissue maintenance / Body composition pathways

CUSTOMER	PROMOTER	QV	CV
$269	$239	120	84

Tesamorelin

Approx. 30-day supply. | 5 mL vial

Tesamorelin stimulates growth hormone release and has been studied for reducing excess visceral fat, the fat surrounding internal organs, in adults with HIV-related lipodystrophy. This specific use differs from general weight management. A provider determines whether treatment fits the person's diagnosis.

STUDIED USE

Visceral fat reduction / HIV-related lipodystrophy care

CUSTOMER	PROMOTER	QV	CV
$329	$299	150	105

BPC-157

Approx. 30-day supply. | 5 mL vial

BPC-157 is a peptide explored in early research on tissue repair and digestive health. Studies examine processes involved in healing, inflammation, and protection of digestive tissues. Its potential benefits for recovery and gut health in people are still being evaluated.

AREAS OF EARLY RESEARCH

Tissue repair / Digestive health / Recovery

CUSTOMER	PROMOTER	QV	CV
$279	$249	125	88

05 / Energy + Longevity

Explore cellular function, nutrient support and focus research.

NAD+

Approx. 5-week supply. | 10 mL vial

NAD+ is a coenzyme found in your cells that helps turn nutrients into usable energy. It also supports enzymes involved in cell repair and normal cell function. These essential roles are the focus of ongoing research into NAD+ and healthy aging.

BIOLOGICAL ROLES

Cellular energy / Cell repair pathways / Normal cell function

CUSTOMER	PROMOTER	QV	CV
$219	$199	100	70

MOTS-C

Approx. 30-day supply. | 5 mL vial

MOTS-C is a peptide involved in signals that help cells manage energy. Early research explores how it affects the way the body uses glucose and responds to insulin. Its potential role in metabolic health and physical function remains under study.

AREAS OF EARLY RESEARCH

Cellular energy use / Glucose metabolism / Insulin response

CUSTOMER	PROMOTER	QV	CV
$259	$229	115	80

Glutathione

Approx. 15-week supply. | 30 mL vial

Glutathione is an antioxidant naturally made by the body. It helps protect cells from oxidative stress and supports processes that keep cells functioning normally. Research into supplementation explores whether increasing glutathione levels can offer additional benefits for specific health needs.

BIOLOGICAL ROLES

Antioxidant defense / Oxidative stress protection / Normal cell function

CUSTOMER	PROMOTER	QV	CV
$179	$159	80	56

05 / Energy + Longevity

Explore cellular function, nutrient support and focus research.

Methylcobalamin (B12)

Approx. 30-day supply. | 30 mL vial

Methylcobalamin is a form of vitamin B12, a nutrient needed for healthy nerves, red blood cell formation, and energy metabolism. Replacing low B12 can help address symptoms caused by deficiency, including tiredness. Extra B12 has not been shown to increase energy when levels are already adequate.

POTENTIAL BENEFITS WHEN B12 IS LOW

Healthy nerves / Red blood cell formation / Energy metabolism

CUSTOMER	PROMOTER	QV	CV
$239	$209	105	74

Semax Nasal Spray

Approx. 30-day supply. | 6 mL nasal spray

Semax is a peptide being researched for memory, attention, and other aspects of brain function. Studies explore its effects on brain signaling and responses to stress or injury. Benefits for everyday focus and mental performance are still being evaluated.

AREAS OF RESEARCH

Focus and attention / Memory / Brain signaling

CUSTOMER	PROMOTER	QV	CV
$209	$189	95	67

06 / Sexual Wellness

Explore options for sexual desire and erectile function.

PT-141

Approx. 5-week supply. | 5 mL vial

PT-141, also called bremelanotide, acts on brain pathways involved in sexual desire. It is used in a specific prescription formulation for certain premenopausal women whose low desire causes distress. It is intended to address desire rather than improve sexual performance.

POTENTIAL BENEFITS

Sexual desire / Reduced distress from low desire

CUSTOMER	PROMOTER	QV	CV
$199	$179	90	63

Tadalafil (90 ct)

Approx. 90-use supply. | 90 count

Tadalafil helps improve blood flow to the penis to support getting and maintaining an erection with sexual stimulation. Its effects can last longer than those of some other erectile dysfunction medicines. It supports the physical erection response rather than increasing sexual desire.

POTENTIAL BENEFITS

Erection support / Improved blood flow

CUSTOMER	PROMOTER	QV	CV
$279	$249	125	88

Sildenafil (90 ct)

Approx. 90-use supply. | 90 count

Sildenafil helps improve blood flow to the penis to support getting and maintaining an erection with sexual stimulation. It is used to treat erectile dysfunction when prescribed for that purpose. It supports the physical erection response rather than increasing sexual desire.

POTENTIAL BENEFITS

Erection support / Improved blood flow

CUSTOMER	PROMOTER	QV	CV
$279	$249	125	88

Your next step

Five simple steps, from selection to delivery.

01 Select Your Treatment

Choose the treatment you are interested in. Selection does not guarantee a prescription.

02 Create Account + Checkout

Set up your account, then enter your shipping, billing and payment details online.

03 Complete the Safety Questionnaire

Share your health history, medications and other information your provider needs to review.

04 Provider Review

A licensed provider evaluates your information and determines whether treatment is appropriate.

05 Pharmacy Fulfillment

If approved and prescribed, a licensed pharmacy dispenses your medication and ships it directly to you.

About treatment and supply information

A licensed provider reviews your health history, medications and any relevant test results to determine whether treatment is appropriate. Some peptides remain under study; research findings are not a promise of individual results. A prescription is never guaranteed.

Compounded medications are not FDA approved. Approximate supply estimates do not override pharmacy storage, discard or beyond-use instructions. Follow your provider's directions and pharmacy label. Prices and availability may change; confirm them at checkout.
